BATUHAN KIŞLACI

Industrial Engineer

📞 +905375027614   ✉ info@batuhankislaci.com   📍 Eskişehir/Tepebaşı

EXPERIENCE

Lean Manufacturing Project Intern
Eskisehir Chamber Of Industry

📅 10/2024 - Present   📍 Eskişehir, Turkey

• Contributed to the state-supported 'Model Factory' program, focused on improving small and medium-sized enterprises SMEs) in organized industrial zones. Played a key role in implementing lean transformation initiatives, including waste reduction, improving Overall Equipment Efficiency OEE , conducting Value Stream Mapping VSM , applying 5S practices, and utilizing Just-in-Time JIT methodologies. Gained hands-on experience in four medium-sized enterprises, enhancing operational efficiency and productivity through the deployment of various lean production techniques.

Lifeguard - Work and Travel
Schlitterbahn Waterparks

📅 06/2023 - 10/2023   📍 Austin, United States

• Participated in the Work and Travel program in the United States, residing in Texas for four months and traveling across nine states. This experience enhanced my English language skills, broadened my cultural perspective, and provided valuable international exposure.

VOLUNTEERING

Social Media Marketing Specialist
ESN ESTU

📅 11/2020 - 09/2021   📍 Eskişehir, Turkey

• Created social media content and promoted events to increase engagement and participation.

PROJECTS

Personalized Career Decision Support System

📅 09/2024 - Present   📍 Eskişehir, Turkey

• Currently developing a thesis project focused on creating an AI-powered system tailored for university students, new graduates, and individuals looking to change careers. The system is designed to recommend suitable job titles based on users' existing skills and identify essential skills required for targeted roles. By leveraging advanced machine learning algorithms, the platform helps users bridge skill gaps, facilitates continuous career development, and empowers individuals to acquire the necessary skills for career advancement, ultimately supporting personal growth and upskilling effor ts.

Inventory Tracking System

📅 06/2024 - 08/2024   📍 Edirne, Turkey

• Developed an inventory tracking system for a family store to monitor product performance and track stock levels. The system provides real-time insights into sales performance and inventory status. With an easy-to-use interface, staff can efficiently manage stock, while an SQL database ensures secure and effective data storage. This solution improved inventory management and supported better decision- making for the business.
